

Managed IT Services

Partner with a leader in enterprise cloud services, infrastructure services, data transformation services and IT systems to better drive your business.

93% of businesses surveyed said that their managed services arrangements either met or exceeded their cost-savings expectations.¹

IT plays a central role in today's corporate environment. Even if you have sufficient IT resources, if you don't have a dedicated IT talent who know how to implement, maintain, and monitor network systems, your business won't stay competitive for long in today's fast-evolving market.

Below are a few questions to determine your level of IT resources:

- **Are your current technology solutions up-to-date?**
- **Are all your computers protected with an effective antivirus solution?**
- **How frequently do you monitor your network security?**

Ricoh offers a package for your IT that can cover PC, server and network devices.

This provides a simple, effective way to monitor and free up your IT resources for strategic business initiatives and let us handle your ongoing IT management to ensure your infrastructure remains stable and secured.

Are you wondering how to achieve any of these for your system?

Reducing downtime

Improving system performance

Keeping your servers, PCs and laptops working perfectly

Installing updates and system upgrades

Our one-stop Managed IT Services cover four areas:

Proactive Monitoring

Scheduled Maintenance

Help-desk Support

Regular Review with Monthly Report
